

 DURAVIT

**NEW SERIES
2023**

Upgrade Your Everyday

We're constantly striving for originality. Nobody wants to be like everybody else; everybody wants to be different. We look everywhere for ideas that make us unique. But in the process, we often forget that these ideas are right there, inside us. We just need to give them space to unfold. In a place where we find peace and just be ourselves. Where we can find inspiration and be unique. A place that's much more than the beginning of the day or the start of the night. A place that helps us be as much of an individual as we like. And one that adds something to our life. Each and every day.

The Brand

DESIGN

Design that surrounds us affects how we feel. Design is emotion. That's why our philosophy is that design needs to adapt to people's needs in terms of aesthetics, functionality and sustainability in its production and use. We achieve this on a global level by working with an international network of designers. By combining their ideas with our in-house expertise, a diverse range of designs and innovative approaches are produced that are as unique and stylish as they are exclusive.

EXCELLENCE

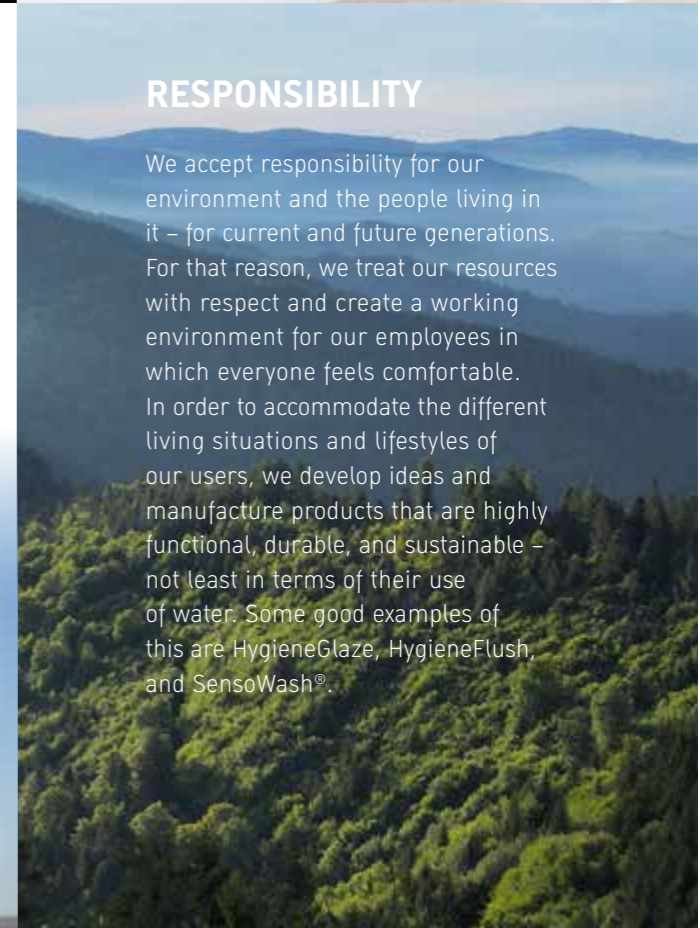

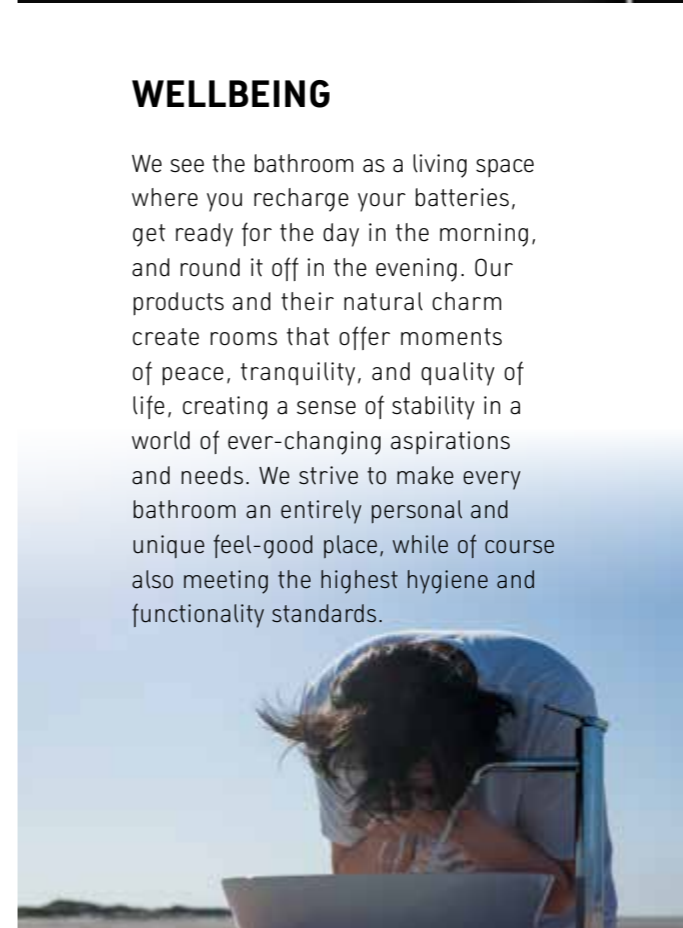

Creating sophisticated products requires a high degree of technical expertise combined with manual craftsmanship. This is something we practice at our development centers and production plants at more than ten locations around the world. Here, our employees develop and manufacture our products using state-of-the-art technologies, artisanal skills, and meticulous attention to detail. This aspiration to achieve the ultimate excellence is deeply rooted in the company. It is evident in all our processes, from the R&D department to the service team, and in more than 200 years of our company's history.

WELLBEING

We see the bathroom as a living space where you recharge your batteries, get ready for the day in the morning, and round it off in the evening. Our products and their natural charm create rooms that offer moments of peace, tranquility, and quality of life, creating a sense of stability in a world of ever-changing aspirations and needs. We strive to make every bathroom an entirely personal and unique feel-good place, while of course also meeting the highest hygiene and functionality standards.

RESPONSIBILITY

We accept responsibility for our environment and the people living in it – for current and future generations. For that reason, we treat our resources with respect and create a working environment for our employees in which everyone feels comfortable. In order to accommodate the different living situations and lifestyles of our users, we develop ideas and manufacture products that are highly functional, durable, and sustainable – not least in terms of their use of water. Some good examples of this are HygieneGlaze, HygieneFlush, and SensoWash®.

Qatego

Design by STUDIO F·A·PORSCHE

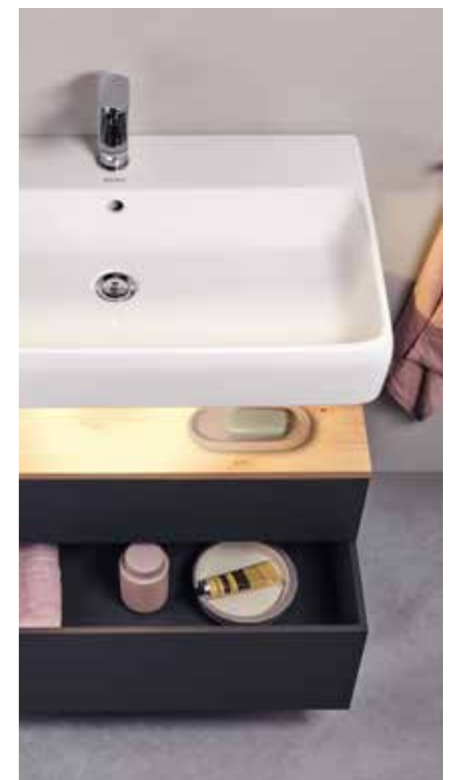

Qatego - Feel-good oasis with timeless character

Qatego is inspired by the feel of nature, like stone washed smooth by the flow of water. Studio F. A. Porsche has designed a bathroom series with clear, reduced objects that exudes naturalness. It relies on natural materials with tactile surfaces such as wood, ceramics and natural stone. The designers see the washbasin and furniture as a creative and functional unit. While the cabinets are kept linear and minimalist, the sanitary objects stand out with their rounded shape. The clear, simple design language also serves as a counter-world to the hustle and bustle of everyday life and as a very private space.

Studio F. A. Porsche – The Designers

As a premium design agency, Studio F. A. Porsche designs products for clients worldwide, turns brands into an experience and brings the highest standards into perfect form. The Porsche name is known around the globe, its iconic, timeless design unmistakable. In 1963, Ferdinand Alexander Porsche designed the Porsche 911, a sports car that remains iconic to this day and exemplifies his design maxims. Optimizing the function, reducing the form to the essentials, and overcoming the familiar in order to keep discovering new, better solutions. Clear lines, purism and elegance are just as important as the durability and honesty of the materials.

DuroCast

Vitrium

Millio

Bento Starck Box

Durable and extremely hard-wearing

Our in-house solid surface material DuroCast is manufactured to meet the highest quality demands. We have developed the recipes ourselves and produce DuroCast products in our own production facilities. Our focus is always on high quality - the materials go through ten different quality tests such as thermal shock resistance, scratch resistance and impact resistance before we finally manufacture them. This means we can always offer the best products - for every application. The complete bathroom can now be equipped with matching DuroCast products - from washbasins and toilets to bathtubs and shower trays: one feel, one design, products from a single source. Depending on the area of application, the material is optimized for color fastness, impact resistance, sustainability or other conditions.

Vitrium

Design by Christian Werner

Vitrium – Cozy natural spaces.

Different geometries combine to create a minimalistic overall look. The subtle colors, tactile surfaces and backlit fronts surfaces create an outstanding quality of living. The washbasins are made from DuroCast UltraResist, since a high resistance is required in the washing area. The vanity units come with a fine metal frame and a choice of fronts made from backlit glass, or various decor finishes like wood optic or uni colors. The result is a natural-looking ensemble that radiates coziness.

Christian Werner - The Designer

Christian Werner is a designer who lives and breathes the topic of bathrooms and sanitaryware. He has worked with Duravit on innovative bathroom solutions for many years. After six furniture projects he has now designed his very first washbasins in interaction with the furniture of the series. He is one of the best interior designers in Germany and has won the red dot award as well as other prizes several times with his designs.

Vitrium

Design by Christian Werner

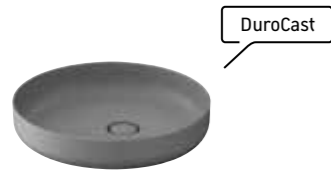

Color up your everyday

We add color to the bathroom - washbasins, furniture, toilets, or bathtubs are now available in a total of six colors. The color concept was curated by Christian Werner, who is also responsible for the formal design of Vitrium bathroom furniture and washbasins. The colors radiate presence, but not dominance, and respond as a matt-warm contrast to wood, stone surfaces, concrete or coordinated tiles, or can create a solid-color bathroom as a complete look.

Millio

Design by Antonio Bullo

Millio – helps you to express your individuality

A new toilet material combination out of ceramics and DuroCast Smooth brings more diversity into the toilet range. New shapes and colors provide accents in the bathroom and together with the texture of DuroCast Smooth, result in a soft and warm haptic.

Bento Starck Box

Design by Philippe Starck

Bento Starck Box – elegant serenity

A sophisticated design statement to meet the most exacting architectural demands. "The Bento Starck Box collection is the start of an elegant serenity," says creator Philippe Starck. With intelligently divided wet and dry areas, the clean, clearly structured washing areas and bathtubs open up countless options for personal design.

Philippe Starck – The Designer

Philippe Starck, world famous creator with multifaceted inventiveness, is always focused on the essential, his vision: that creation, whatever form it takes, must improve the lives of as many people as possible. This philosophy has made him one of the pioneers and central figures of the concept of "democratic design".

Faucets

Design by Duravit

The new faucets lines - circular simplicity, precise edges and soft dynamics

Our faucets, showers and accessories are the perfect addition to any area – from the vanity to the shower to the bathtub. That's because all Duravit products are developed to high standards of design, to provide users with comfort and visual appeal every day. Our faucets, showers and accessories underscore this claim: With modern and timeless shapes as well as intelligent and sustainable functions, they bring a holistic approach to bathroom design. The new faucet series offer new design possibilities for every bathroom. It is the perfect combination of design, highest quality and sophisticated technology.

Circle – circular simplicity

The new faucet series follows a restrained-minimalist design approach, matching many timeless-modern bathroom series. The basic shape of the circle consistently defines the basic body, spout and handle, which fit together harmoniously. Details such as the joint between the basic body and handle, which has been reduced to a minimum, or the integrated aerator underline the perfect look.

Manhattan – precise edges

The dominant design element is the cube. Precise lines and edges characterize the design language full of character, which are additionally emphasized by fine light reflections and therefore create a high-quality look. At the same time, generous surfaces and precise transitions underline the timeless yet striking elegance, which harmonizes perfectly with clear and modern interior designs. Available in chrome and matt black, Manhattan makes an impressively characteristic appearance.

Wave – soft dynamics

Wave represents a modern, young design style. The slender, cylindrical body flows smoothly into the spout, which is finely rounded at the front and creates an exciting contrast with its precise edges. The dynamically upward-pointing handle is a real delight for the hand, providing easy and precise operation. With new metallic finishes the series offers additional attractive options for individual bathroom designs.

SensoWash®

SensoWash® – the most natural form of hygiene

Maximum comfort, an uncompromisingly minimalistic look – the SensoWash® shower-toilets excel with the latest, comfort-enhancing technology and meet the highest sustainable design standards, while also being intuitive to configure and operate by remote control or via the SensoWash® app.

Philippe Starck – The Designer

The successful series between the renowned star designer Philippe Starck and Duravit continues. After bestsellers such as Starck 3 and ME by Starck, Duravit and Philippe Starck have created a shower-toilet generation for modern, natural toilet hygiene.

Bertrand Lejoly – The Designer

The Belgian designer Bertrand Lejoly demonstrates his extraordinary feeling for interior design. He himself describes his style as refined simplicity. The linear, geometric and calm appearance becomes clearer with every glance, because the clear design of the range fits perfectly into the room, with absolute self-assurance.

HygieneGlaze - 99.9 % antibacterial

Optimal hygiene standard: With HygieneGlaze, 90% of the bacteria is killed within six hours and 99.9% within 24 hours. The antibacterial glaze is burned into the interior of toilets and urinals up to the rim, and does its job wherever bacteria occur.
